

Introduction to .NET Development (Lunch and Learn)

This Lunch & Learn session introduces developers to web-based application development using Microsoft .NET technologies.

Cardinal's clients have used the knowledge they have gained from this seminar to address the following issues:

- Utilize object-oriented programming strategies to help reduce programming and debugging errors
- Increase development efficiency by becoming familiar with the fundamental foundation elements that are required when developing with .NET
- Improve productivity by becoming more familiar with the .NET Development and Deployment Tools
- Avoid mistakes that are common to .NET development by implementing industry best practices and lessons learned

Who Should Attend?

Developers who are interested in learning about the benefits and best practices associated with Microsoft .NET.

Prerequisites

Some programming experience is helpful, but not required.

Topics Covered

- What is .NET?
 - .NET Framework
 - Common Language Runtime
 - Supported Languages
 - XML web services
- Implementing .NET
 - ADO .NET
 - New and improved security model
 - Error handling and tracing
 - Deployment
 - Remoting
 - Logging and Tracing
- .NET Best Practices
 - Custom Controls
 - Client side validators
 - Data binding with data grids
 - Developing applications for mobile devices

Materials Provided

Course manual

Enrollment Details

Course Length: 2 – 3 hours (11:00 a.m.-2:00 p.m.)

Locations: Cincinnati, Columbus, Charlotte
